

BATHROOM COLLECTION

COMPANY

Tecnologia, estetica ed elevate prestazioni: FIMA Carlo Frattini propone da oltre 60 anni rubinetteria di altissima qualità, destinata a durare nel tempo e capace di dare valore aggiunto ad ogni progetto. L'Azienda ha assunto negli anni un taglio innovativo ed in continua evoluzione grazie alla creatività, al design e alle nuove tecnologie che differenziano le sue collezioni. FIMA, infatti, si rinnova costantemente, come dimostrano l'alto livello progettuale e qualitativo della produzione, i continui investimenti in ricerca, la forte espansione nazionale e internazionale, la professionalità del team aziendale.

Technology, aesthetics and performance: FIMA Carlo Frattini has been offering for more than 60 years high quality faucets designed to last over time and able to give added value to each project. Over these years the company has taken an innovative and evolving feature, thanks to its creativity, design and new technologies, which differentiate its collections from others. FIMA, in fact, is being continually upgraded by way of its high level of design, quality of production, continuous investment in research, the strong national and international expansion and the professionalism of the corporate team.

GREEN

FIMA Carlo Frattini da anni evolve i propri processi produttivi finalizzandoli ad una costante riduzione di risorse, materiali ed energia. Opera inoltre un controllo costante sulle materie prime, sui consumi e sull'impatto ambientale di tutte le fasi di produzione e commercializzazione dei propri prodotti. È un'azienda eco sostenibile, alimentata da energia auto-prodotta e in grado di realizzare prodotti sicuri per la salute e con un basso impatto ambientale.

FIMA Carlo Frattini has been constantly developing its production processes in order to reduce the use of resources, materials and energy. Furthermore, all FIMA Carlo Frattini projects are developed considering all the steps of product's life, from its manufacturing to the shipment till its dismantlement. FIMA is an eco-sustainable company, powered by self-produced energy and able to manufacture products that are safe for health and have a low environmental impact.

QUALITY

FIMA Carlo Frattini utilizza i migliori materiali e tecnologie all'avanguardia, per garantire prodotti di utilizzo quotidiano durevoli nel tempo. Sposa inoltre un approccio globale alla qualità che si traduce in un'attenzione all'innovazione tecnologica, adottando processi industriali all'avanguardia e scegliendo le migliori materie prime. Tutti i prodotti vengono sottoposti a minuziosi e severi controlli in ogni fase di lavorazione e sono progettati in modo da rispettare le più rigide normative internazionali. Ulteriore testimonianza di questa filosofia improntata alla qualità totale è la garanzia, che si estende per ben sette anni su tutta la produzione.

Best materials and cutting-edge technologies as a guarantee for an everyday use unchanging over time. FIMA Carlo Frattini follows a global approach to quality coming from a particular attention to technology innovation, by adopting cutting-edge industrial processes and choosing the best raw materials. Detailed strict controls are carried out on all the products in every production phase and all the items are designed in order to respect the most stringent international regulations. Its seven-year extended warranty on all the products is a further evidence of this philosophy based on total quality.

DESIGN

Prodotti unici nel loro genere, studiati per massimizzare il comfort di utilizzo e con un inconfondibile tocco Made in Italy. Convinta del potere della creatività, del design e delle nuove tecnologie, l'Azienda ha assunto negli anni un taglio innovativo e in continua evoluzione. Questo atteggiamento l'ha portata a interpretare e anticipare le esigenze presenti e future del mercato, proponendo prodotti all'avanguardia per design e tecnologia.

One-of-a-kind products, designed to maximize the comfort in use with an unmistakable hint of Made in Italy. The Company, firmly confident of the power of creativity, design and new technologies, has developed over the years innovative and ever-changing traits. This approach has led it to interpret and anticipate the current and future market needs, by proposing state-of-the-art products in terms of design and technology.

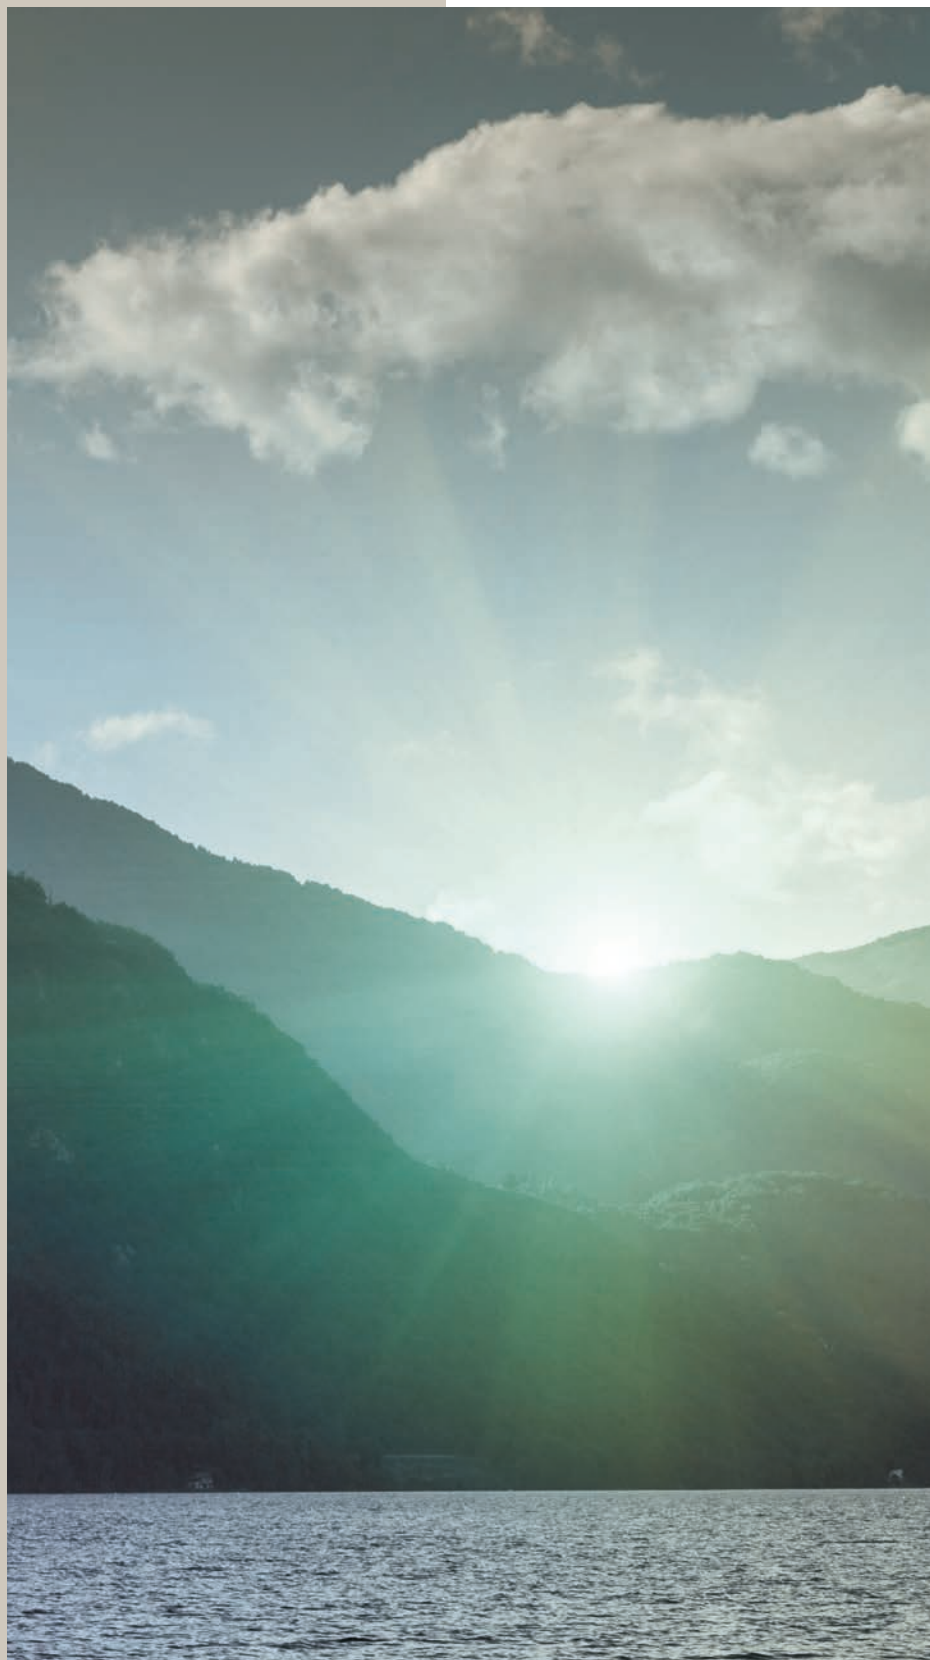

LOVE FOR THE TERRITORY

La bellezza del paesaggio che circonda FIMA Carlo Frattini è la vera guida di ogni scelta aziendale. La cultura del territorio e il contesto in cui sorge l'azienda spinge tutte le persone e i collaboratori a fare ogni giorno scelte sostenibili per l'ambiente e per la comunità locale. L'intero polo produttivo è alimentato a energia solare. L'elettricità è generata grazie a due impianti fotovoltaici in grado di soddisfare il fabbisogno dell'azienda, mentre nelle giornate invernali e di maltempo l'elettricità acquistata proviene esclusivamente da fonti rinnovabili. I continui investimenti in nuovi macchinari e l'impiego di tecnologie digitali all'avanguardia garantiscono una produzione industriale sempre più controllata, interconnessa ed efficiente con conseguente riduzione di sprechi e di risorse.

The beauty that surrounds FIMA Carlo Frattini is the true leader of every company decision. The culture for the territory and the context in which the company is located, naturally pushes people and coworkers to make ecofriendly choices every day. The entire production site is powered by solar energy. Electricity is generated thanks to two photovoltaic systems capable of generating up to 520 KW/h on sunny days, while on winter and bad weather days the electricity purchased comes exclusively from renewable sources. The continuous investments in new machines and the use of digital advanced technologies allow an always controlled industrial production, interconnected and efficient, with a resulting reduction of waste and resources.

SO AQUA COLLECTION

Frutto di una progettazione basata sulle abitudini di utilizzo, sull'ergonomia e sull'efficienza, la gamma di miscelatori So si arricchisce con la gamma di maniglie in vetro lucido o satinato Aqua Collection. L'ampia gamma di finiture in vetro lucido o sabbato donano un tocco glamour alla stanza da bagno grazie ai giochi di colore e ai riflessi ricreati dal vetro. I colori spaziano dai pastello Rosa antico e Verde agave fino ai più classici Cromo, Bronzo, Oro e Bianco avorio che ampliando ancor di più le possibilità compositive di questa serie.

The result of a design based on usage habits, ergonomics and efficiency, our SO range of mixers expands with the new Aqua Collection, a collection of handles in polished or frosted glass. The wide range of finishes adds a glamorous touch to the bathroom thanks to the plays of colour and reflections created by the glass. Colours range from pastel Antique pink and Agave green to the more classic Chrome, Bronze, Gold and Ivory white, further expanding the compositional possibilities of this series.

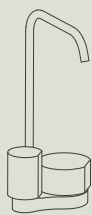

Nata da uno studio delle modalità fruibili di un miscelatore tradizionale, l'innovativa versione monoforo doppio comando coniuga la praticità di un solo semplice gesto con l'esigenza di avere sempre l'acqua alla temperatura desiderata, per un comfort e una semplicità di utilizzo senza eguali. La vocazione green si trova nella canna che, con un diametro di 10 mm, limita la portata di erogazione dell'acqua soddisfacendo al contempo le esigenze di utilizzo quotidiane.

The innovative single-hole double control version represents a refined evolution of a traditional mixer. It derives from the study of modes of use and combines the practicality of a single simple gesture with the need to always have water at the desired temperature, for unparalleled comfort and ease of use. The green vocation lies in the spout which - with a diameter of 10 mm - limits the flow rate of the water supply while satisfying the demands of daily use.

L'ergonomia degli elementi di comando è stata studiata attentamente per assicurarne una presa agevole. La zigrinatura verticale dei profili, specificatamente ingegnerizzata, crea un contrasto con le superfici lisce della manopola dando vita a un design unico e inconfondibile.

Handles have been conceived to ensure an easy grip. The vertically knurled pattern creates a contrast with the flat surface of the knob giving life to an unmistakable and unique design.

La serie Switch offre diverse possibilità di configurazione grazie alla versione mensola e alla versione colonna. Tutto il sistema Switch è stato compattato in un corpo ridotto e dagli ingombri minimi. I comandi di regolazione di temperatura e flusso sono integrati insieme ai due pulsanti di attivazione dell'uscita del soffione e del doccino. La pratica struttura a mensola disponibile in varie finiture viene abbinata a un ripiano in vetro satinato, donando stile distintivo a ogni ambiente doccia.

The series Switch offers different configurations such as the exposed shower version with built in shelf and the exposed column version. The Switch system has been compacted in a small body with the flow and the temperature knobs and the on/off buttons to get water from the showerhead and/or the handspray. The body is available in different finishes and the shelf in satin glass gives a distinctive style to the shower area.

Un pratico pulsante a pressione permette l'attivazione di ciascun flusso. L'elemento on/off può essere abbinato a qualsiasi punto di erogazione a parete. È inoltre disponibile un kit di differenti tasti personalizzati e facilmente intercambiabili che permettono una facile identificazione dell'uscita corrispondente: bocca a parete, getto laterale, soffione, doccia, lama d'acqua e il pratico pulsante a cuore per identificare la propria uscita preferita.

A handy push button allows the activation of each flow. The on/off element can be combined with any wall outlet. A set of different customised and easily interchangeable buttons is also available. They allow for easy identification of the corresponding outlet: wall mounted spout, side jet, showerhead, handshower, water blade and the heart button, designed to select your favourite outlet.

SWITCH ON

DAVIDE
VERCELLI
DESIGN

Switch On completa e amplia il sistema doccia Switch, cui principale plus è la possibilità di "azionare", con la semplice pressione di un tasto a sfioro rotondo, i flussi di acqua in corrispondenza dell'uscita stessa.

Switch On comes from the desire to complete and expand the Switch shower system. The series is unique in the sector, from a functional and design point of view, due to its simple rounded, light-touch button switch.

^ F5951X5BS
Miscelatore lavabo a parete con pulsante on/off
Wall mounted basin mixer with on/off button

Dall'evoluzione della tecnologia di Switch, Switch On eredita linee e funzionalità con un nuovo corpo a incasso dall'ingombro estremamente ridotto, per un prodotto dal design minimale ed essenziale.

A further development of Switch is Switch On with an extremely small body that creates a minimal essential design.

SWITCH ON

^ F5951X5CN

Miscelatore lavabo a parete con pulsante on/off

Bocca a parete per vasca
Wall mounted bath spout

Nella versione doccia e vasca la serie Switch On si contraddistingue ancora di più per la sua estetica minimale e le dimensioni estremamente compatte. Qui la funzionalità del bottone permette di selezionare l'uscita desiderata, mentre la manopola del flusso consente l'apertura dell'acqua e quella della temperatura la sua regolazione.

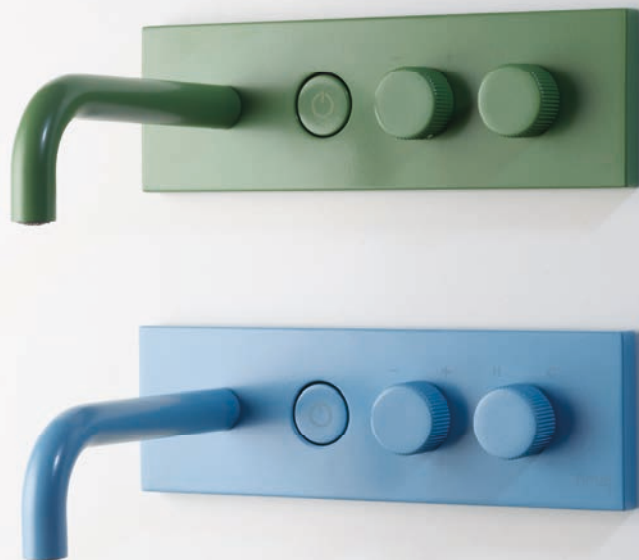

In the shower and bath version the Switch On series stands out even more with its minimalist aesthetics and extremely compact dimensions. Here, the push-button's function is to select the desired outlet, while the flow knob allows the water to be opened/closed and the temperature knob regulates its adjustment.

OUTDOOR

Cuore del progetto è la ricchezza delle finiture delle manopole, disponibili in tre varianti con segni distinti che ritraggono altrettante texture superficiali tridimensionali: (H) Horizontal, che propone un effetto a righe orizzontali tridimensionali dal mood hi-tech; (X) Cross il cui naming svela un'elegante superficie sfaccettata, ispirata alla preziosa pietra diamante, per ambienti sofisticati; (V) Vertical, contraddistinto dal rigore geometrico di un poligono a 19 facce.

The heart of the project is the richness of the knobs finishings, available in three variants with distinct signs depicting tridimensional surface textures: (H) Horizontal, offering a tridimensional effect with horizontal stripes of hi-tech mood; (X) Cross whose naming reveals an elegant faceted surface, inspired by the precious stone diamond, for sophisticated environments; (V) Vertical, characterized by geometric rigor of a polygon with 19 faces.

La massima personalizzazione è assicurata anche dalla possibilità di poter scegliere tra oltre 14 diversi top: 6 finiture galvaniche, 6 finiture PVD, bianco e nero opaco oltre ai preziosi marmo bianco di Carrara, marmo nero Portoro.

A further personalization is ensured by the possibility to choose from 6 different handle tops: chrome, white, black, white Carrara marble, black Portoro marble and gold, for original combinations of a new aesthetic and a creative custom made.

La leva laterale contraddistingue l'estetica di questa collezione. L'elemento di comando si interseca lateralmente al corpo del miscelatore con precisione ed equilibrio lasciando inalterata la leggerezza estetica delle forme. I volumi sono minimizzati al massimo e si raccordano con la bocca di erogazione girevole inclinata verso l'altro e dalla superficie piana.

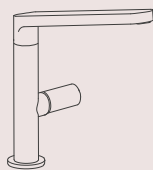

The side lever marks the aesthetics of this collection. The handle intersects laterally with the body of the mixer with precision and balance, leaving the aesthetic lightness of the shapes unchanged. The volumes are minimized as much as possible and blend with the upwards tilted swivel spout and the surface.

Forte del suo valore estetico ed espressivo, la leva è al centro della progettazione: da un lato la silhouette organica e femminile, estremamente sottile e leggermente piegata, evoca leggerezza visiva e morbidezza delle forme; dall'altro lo speciale meccanismo di apertura a scivolo ne rende il movimento quasi un gioco di magia, esaltando il corpo del miscelatore che si innalza oltre la canna e si fonde con la parte alta della leva.

Strong in its aesthetic and expressive value, the lever is the main focus of the design. On the one hand, its organic and feminine silhouette, extremely slim and slightly bent, evokes visual lightness and softness. On the other hand, the special slide-opening mechanism makes its movement almost a magic trick thus enhancing the body of the mixer that rises above the spout and blends with the upper part of the lever.

Un attento studio delle forme e delle proporzioni di Flò, con le sue parti rastremate verso il basso raccordate da linee semplici e piatte, ha permesso di eliminare la basetta. Il risultato è un miscelatore che coniuga stile, personalità e alte prestazioni.

A careful study of the shapes and proportions of Flò, with its downward tapered elements that are connected by simple and flat lines, allowed to completely remove the base. The result is a mixer that combines style, personality and high performance.

Exposed bath mixer with shower set

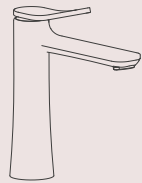

Non solo estetica ma anche ricerca funzionale ed ergonomica caratterizzano il corpo miscelatore esterno per vasca. Un pulsante a pressione permette una pratica deviazione del flusso verso il doccino con un solo gesto e la sua posizione nascosta sul lato del prodotto garantisce la massima pulizia estetica senza alcun compromesso.

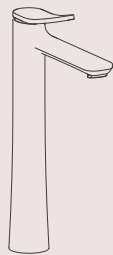

The external bath mixer body is characterized not only by aesthetics but also functional and ergonomic research. A push button allows convenient deviation of the flow to the hand shower with a single gesture. Its hidden position on the side of the product ensures maximum aesthetic cleanliness without any compromises.

Carattere evidente, volumi importanti, tante raggiature accuratamente proporzionate per accarezzare il prodotto, lasciandolo in equilibrio tra forme cilindriche classiche e linee moderne.

Distinctive character, bold volumes, with carefully proportioned radii that caress the product, crafting a balance between classic cylindrical shapes and modern lines.

L'assenza di vincoli progettuali ha permesso di equilibrare corpo, canna e leva, lavorando anche sulla giunzione tra gli elementi.

Having fewer design constraints made it possible to balance the body, spout and lever, as well as joints between elements.

Gli studi sui raggi di curvatura sono stati determinanti per rendere il prodotto più armonioso e moderno. Volumi cilindrici con un accento bold, per seguire i trend più attuali.

The ability to think about the radii of curvature was crucial in making the product more harmonious and modern. Thus, the cylindrical volumes can take on a bold accent, in line with the most current trends.

Il corpo di Snap è un pezzo unico e massiccio, con raggiate pronunciate e una basetta integrata che facilita notevolmente le operazioni di installazione del prodotto. Il comando invece è più contenuto, con una leva allungata e sottile che offre una superficie piana alla vista, ma addolcisce gli spigoli in corrispondenza della presa. La maniglia scorre sul corpo per aprire e chiudere l'acqua, senza interruzioni formali, a vantaggio della fruibilità e della pulizia estetica.

The body of Snap is one single, massive piece, with pronounced curves and an integrated base that greatly facilitates the installation of the product. The control, on the other hand, is more contained, with a thin, elongated lever that offers a flat surface to the eye, softened along the edges in correspondence with the grip. With a special mechanism, the handle slides on the body to open and close the water flow, without any formal interruptions, to the advantage of usability and aesthetic cleanliness.

SPILLO TECH

FIMALAB
DESIGN

Tre i segni materici distinti che riproducono altrettante superfici tridimensionali con un gioco di rimandi dalla basetta alla leva, integrata armoniosamente nel corpo del miscelatore. Si tratta di: (X) Cross il cui naming svela un'elegante e lussuosa superficie finemente sfaccettata, ispirata al prezioso diamante intagliato, ideale per ambienti sofisticati; (G) Godronata, che propone un effetto micro-diamantato dal mood fortemente industriale; (V) Vertical, contraddistinta dal rigore geometrico di un poligono a 19 facce.

Three different material signs that reproduce three-dimensional surfaces with a suggestive connection between base and handle, harmoniously integrated in the mixer. They are: (X) Cross, whose naming reveals an elegant and luxurious faceted surface, inspired by the precious stone diamond, excellent for sophisticated environments; (G) Knurled, a micro-diamond effect with a strongly industrial mood; (V) Vertical, characterized by the geometric rigor of a 19 faces polygon.

La realizzazione delle maniglie e di ogni componente speciale della serie avviene un pezzo alla volta. La particolare lavorazione delle texture richiede infatti uno speciale macchinario utilizzato in FIMA Carlo Frattini solo per la lavorazione di questa serie. Solo grazie all'utilizzo di speciali utensili diamantati è possibile ottenere la precisione di lavorazione richiesta per ottenere una lucentezza ineguagliabile anche sotto la lente.

The processing of the handles and each special component in the series is done one piece at a time. In fact, the creation of the textures requires specific machinery used at FIMA Carlo Frattini only for the production of this series. Only with the help of special diamond tools is it possible to guarantee the processing precision required to achieve an outstanding shine.

Un prodotto che coniuga uno stile senza tempo con un materiale dall'anima green: l'acciaio inox, che ha conquistato una propria identità nel settore grazie alle sue proprietà intrinseche di inalterabilità nel tempo, igienicità ed eco-sostenibilità. Oltre a una naturale inalterabilità alle sollecitazioni, l'acciaio inox AISI 316L utilizzato per questa serie non contiene metalli nocivi, non necessita di verniciature o rivestimenti superficiali dannosi per l'ambiente, è atossico e riciclabile.

The perfect combination between design and environmental sustainability, a product that combines a timeless style with essential green materials. The stainless steel has acquired its own identity in the industry thanks to its intrinsic features of inalterability over time, cleanliness and environmental friendliness. In addition to its natural inalterability to stresses, stainless steel AISI 316L does not contain toxic metals, does not need any environmentally harmful surface coatings and it is recyclable.

PVD è l'acronimo di Physical Vapor Deposition ed indica la tecnologia utilizzata per la deposizione di film metallici sottili sulla superficie dei componenti. Il processo avviene tramite la vaporizzazione di un mix di molecole metalliche specifiche, in base al colore che si vuole ottenere, all'interno di camere sotto vuoto. Lo strato depositato conferisce al prodotto una protezione alla corrosione, oltre che un'ineguagliabile durezza superficiale. Il processo è per sua natura ad impatto zero sull'ambiente, poiché non crea rifiuti né emissioni in atmosfera.

PVD stands for Physical Vapor Deposition and indicates the technology used for the deposition of thin metal films on the surface of components. The process takes place through the vaporisation of a mix of specific metal molecules inside vacuum chambers, depending on the desired colour. The deposited layer gives the product corrosion protection as well as incomparable surface hardness. The process has zero impact on the environment, as it creates neither waste nor emissions into the atmosphere.

Stile senza tempo per la serie Zeta, caratterizzata da forme geometriche che si ammorbidiscono nella parte inferiore. Il risultato è un miscelatore dalle linee pulite ed essenziali, capace di inserirsi con eleganza in qualsiasi contesto.

A timeless style for the Zeta line, characterised by geometrical shapes softening on the lower part. The result is a mixer with clean and essential shapes, elegantly adapting to every room.

Arricchisce la serie il miscelatore lavabo a parete disponibile in due differenti versioni con lunghezze di canna differenti e la possibilità di installazione orizzontale o verticale.

The series is enhanced by multiple versions of the wall mounted vvbasin mixer, suitable for both horizontal and vertical installation, and available in two models and with two different spout lengths.

Zeta si contraddistingue per la grande leggerezza formale conferita dalla scelta di montare cartucce molto piccole - 25 mm - che assicurano la massima resa estetica senza compromettere comfort e funzionalità. E' stato così possibile, in fase di progettazione plasmare la silhouette del miscelatore senza vincoli strutturali e senza compromessi estetici.

Zeta is characterized by a swift design which is due to the use of very small cartridges: 25 mm on the washbasin and 31 mm on the shower, ensuring aesthetic harmony while being easy to use and functional. This technical feature enabled the shaping of the mixer's silhouette and the design without any structural restrictions or aesthetic compromises.

Linee senza tempo caratterizzano questa serie, disponibile nelle versioni per lavabo, vasca e doccia, in un perfetto equilibrio tra eleganza e fluidità. Il focus è tutto sui comandi che richiamano lo stile delle rubinetterie tradizionali ma reinterpretato attraverso un linguaggio contemporaneo esteticamente coerente.

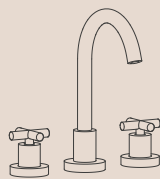

Timeless lines characterize this series, available in washbasin, bath and shower versions, in a perfect balance of elegance and fluidity. The focus is on the control's levers that recall the style of traditional faucets but reinterpreted through an aesthetically contemporary language.

MAST

FIMALAB
DESIGN

Mast si distingue per la pulizia delle linee: tratti sottili e slanciati caratterizzano la bocca e il corpo del miscelatore e il profilo della leva è essenziale e minimale. Forme geometricamente perfette per un design efficiente e funzionale che dialogano con ogni ambiente bagno portando armonia delle proporzioni.

Mast stands out for the cleanliness of its design: thin and slim lines distinguish the spout and the body of the mixer, the base is integrated and the outline of the lever is more essential and minimal. Perfect geometric shapes for a functional and rational design that adapt to any bathroom furniture creating a sense of harmonious proportions.

Questa serie cela un'anima green: la cartuccia ESC (Energy Saving Cartridge) consente infatti di risparmiare da un lato acqua e dall'altro energia. L'apertura dell'acqua fredda in posizione centrale permette di ridurre il consumo di energia, evitando lo spreco di acqua calda. L'acqua miscelata è ottenuta girando la leva verso sinistra, così da garantire un consumo consapevole.

This collection hides also a green soul: the WSC cartridge (Water Saving Cartridge) allows to save both water and energy: gives the possibility of water saving thanks to resistance of the handle in opening, that at first snap dispenses cold water in reduced quantity. To have a greater water flow it is necessary to open completely the handle. It saves energy since supplying less water at the first snap, there is a smaller hot water consumption.

SPOT

FIMALAB
DESIGN

- ✓ F3001NS
Miscelatore lavabo
Basin mixer

Il corpo del miscelatore, che si distingue per le sue linee morbide ma decise, è caratterizzato da una base larga che si rastrema leggermente verso l'alto per alleggerirne il design, come la larghezza della bocca e della leva che si stringono verso l'aeratore.

The body of the mixer, distinguished by its soft but marked lines, is characterized by a wide base which narrows slightly upwards by lightening its design, as well as the width of the spout and the lever which narrows to the aerator.
